

# CONCEPTUAL ENGINEERING

## Online Seminar 2021

### #03 | Delia Belleri (Lisbon)

#### Conceptual Engineering, Language Use and the Neutral Implementation Challenge

##### Abstract

In this paper, I have two goals: the first is to articulate a version of the implementation challenge for conceptual engineering that is as theoretically neutral as possible. The second is to outline a novel response to this challenge, by reflecting on the notion of control.

The **Conceptual Engineering Online Seminar** series is co-organized by the Department of Philosophy of the University of Zurich and the Arché Philosophical Research Centre at the University of St Andrews. The meetings take place on zoom every Tuesday at 4-6pm Swiss Time/3-5pm British Time, from September 14 to December 14, 2021 (with 14 sessions in total).

##### Organizers

Manuel Gustavo Isaac  
& Kevin Scharp
